

The **Natus Biliband Eye Protector** provides exceptional eye protection for neonatal phototherapy.

Independent light transmission tests have shown the **Biliband Eye Protector** to block out more light than other leading brands of phototherapy eye shields¹

*"We liked the **Biliband** (eye protector) better than the goggles our first preemie had to use! The goggles didn't stay on nearly as well as the Biliband."*
- Jason W., Greenwood, IN

Blocks harmful light to baby's eyes

- Provides the best protection from phototherapy light¹
- Special eye-pad material blocks light to the eyes, while headband design allows phototherapy light to reach baby's head

Provides a perfect fit

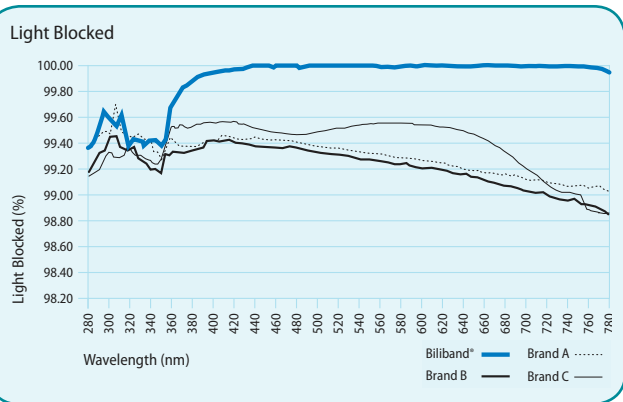

- Remains securely in place with unique Y-shaped design
- Conforms to any head shape with easy-to-use, adjustable tabs

Safe and comfortable

- Patented latex-free material minimizes the risk of skin irritation
- Feels soft and comfortable around baby's head and face

Available in 3 sizes:

Size	Head Circumference	Part Number	Packaging
Regular	30 – 38 cm	900642	20 units/pk
Premature	24 – 33 cm	900643	20 units/pk
Micro	20 – 28 cm	900644	20 units/pk

*Leading brands tested.
