

Plastibell® Circumcision Device

The Most Trusted Brands in Obstetrics

Plastibell® Circumcision Device

A circumcision procedure requiring no special post-operative care or dressing means a significant saving in terms of time and money. The disposable Plastibell® Circumcision Device eliminates the need for repetitive and costly sterilisation required of stainless steel clamps.

Features:

- One piece device plus ligature, clear plastic construction provides visual access at all times
- Produces a clean line of excision helping to promote rapid healing
- No post-operative care or special dressing required
- Sterile, individually packaged in six sizes and assortment pack
