

Glass Milk Storage Baby Bottles

Category: [Breast Milk Storage & Collection Bottles](#)

Sterifeed has launched a 120ml and 240ml glass baby bottle. Glass baby bottles are sometimes a preferred option, due to concerns surrounding BPA problems. Glass baby bottles are viewed as the safest option for a chemical free baby bottle. Glass has the purity of structure that makes any interaction with the stored liquid impossible. Glass baby bottles also have the great advantage of preserving a certain temperature for a longer period of time. They do not dilate when it is too warm or shrink when exposed to lower temperatures.

- Sterifeed Glass bottles are made from Borosilicate laboratory glass made of SIMAX
- Size 120ml & 240ml
- Printed graduations
