BELDICO ... *We simply love babies*

The disposable breast milk collector sets

'A breast shield with a proven efficiency'

INTENTIONS OF USE

The Beldico disposable breast shield allows the easy collection of the mother's milk.

The mother will benefit from the advantages of a disposable hygienic breast shield. The baby will fully profit from the benefits of the mother's milk.

Single breast shield 30 mm with valve

Beldico breast shields

Single breast shields with FTC or valve and feeding bottle

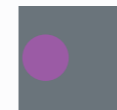

USER FRIENDLY

The milk is collected directly into the Beldico disposable feeding bottles of 50, 120 or 240 ml.

These collection bottles can be stored in the refrigerator or the freezer.

Following the mother's needs, the disposable breast milk collector sets are available in different sizes: 22 mm, 25 mm or 30 mm. Our sets are also suitable for double pumping.

HYGIENIC

For hygiene reasons, the disposable breast shields are presented as single, ready to use products.

The Beldico breast shields are supplied individually wrapped and ETO sterilised.

COMFORTABLE

The form and sizes suit all types of breasts, even in case of inverted nipples.

This disposable breast shields will help the mother to pump smoothly.

It allows an efficient expression of the mother's milk.

Thanks to the ergonomic design and the choice between different sizes, the breast shields assure a perfect and comfortable fit to the mother.

PRACTICAL USE

The breast milk collector sets are compatible with most of the milk pumps. One set is available for use with vacuum pump systems in the hospitals.

The disposable breast milk collector sets with valve are available in different sizes. This range of sets guarantees for each mother a smooth contact with the breast shield and a good aspiration with all the milk pumps available in the hospital.

One of our disposable breast shields has finger tip control, which makes the suction duration very flexible with a vacuum pump system.

The disposable breast milk collector sets are delivered with soft pre-connected tubing and connectors which fit on the different milk pumps.
