* Remark - Warning:

Single use - Multiple use.

Materni (CBM) bottles are suitable for both single and multiple use.

In case of multiple use, after first use, proper cleaning, disinfection or sterilization of the product is required to reduce the risk of (cross)contamination.

Materni strongly recommends to avoid the bottles being used by multiple infants.

For more information, instructions and safeguards, please read the instruction for use notice.

In case of multiple use, Materni declines all responsibility regarding the microbiological conditions of the product.

Breastfeeding is best for babies. Before changing to formula milks, it's recommended to always consult a professional for advise.

Materni bottles, teats and accessories are suitable for professional & personal use.
